SOLARTECH
As Reliable as the Sun

Mega-Tech Controller
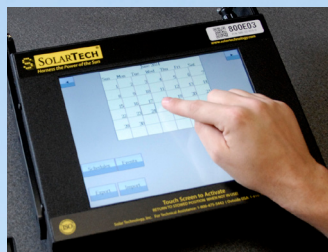

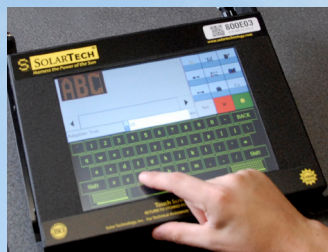

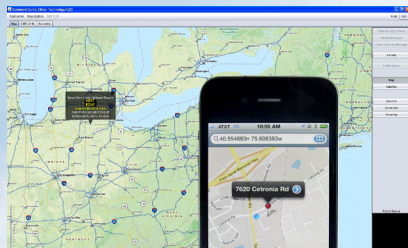

NOW WITH FREE REMOTE ACCESS!

SolarTech's Message Boards now include an Integrated modem and GPS for remote access and location tracking. It's built-in fleet management - for no extra charge!

Using our free Command Center software, you can access your signs, and schedule and change messages using your desktop pc, laptop or smartphone!

EASY-TO-USE CONTROLLER

The Mega-Tech Controller - now in it's 3rd generation - incorporates an interactive touch screen, intuitive TRAFIX software and the rugged construction you've come to expect from Solar Technology.

TRAFIX
Totally Remote Access Flexible Information Exchange

BUILT-IN OPERATING SYSTEM SOFTWARE

The TRAFIX software package included with all Mega-Tech control consoles provides the convenience of touch screen technology with time-saving, user-friendly graphic-driven menus.

With little or no training, a new user can display any one of six preselected messages using the Quick Pick selector screen. In just a few short steps, more than 200 additional multilingual messages can be created and stored, including radar speed notifications (if equipped with optional radar).

The convenient 365 day calendar scheduler provides flexibility for timed, changeable message displays; as simple as making an appointment! A flash drive, Ethernet port, and USB port will provide no hassle simplicity for software upgrades, message file downloads, and network communications.
