Safety Checks

- Ensure all jacks and jackstands lowered prior to raising sign panel.
- Jacks and jackstands should be used if unit is not attached to tow vehicle. Chock wheels prior to detaching from tow vehicle.
- Check for overhead wires & obstructions and ensure locking pins fully retracted prior to raising sign panel.
- Do not stand under sign panel while raising or lowering.
- Keep hands clear of lifting mechanisms at all times.
- Use safety pins provided to prevent inadvertent lowering of sign panel.
- No smoking or open flames near battery compartments.
- Avoid contact with battery fluid at all times – should contact occur flush with water and seek medical attention.
- Always close, latch and lock all battery compartments to prevent tampering with control console and batteries.
- Remove coupler and/or tongue for additional security.

Transporting

☑ Ensure main power switch off.
☑ Ensure all batteries have adequate fluid and are fully charged (>12.6 VDC).
☑ Ensure all solar panels are clean and free from any damage/debris.
☑ Ensure all sign case latches are secured.
☑ Check sign case integrity – no damage & clean.
☑ Close and latch all battery compartment covers.
☑ Secure all battery compartments with padlocks.
☑ Ensure sign panel fully lowered and secured in transport position.
☑ Secure all jacks and jackstands in retracted position.
☑ Secure all locking pins in appropriate positions.
☑ Connect and lock coupler to tow vehicle.
☑ Retract and lock all jacks in horizontal position.
☑ Install safety chains (crisscrossed under tongue).
☑ Connect stop, tail and turn lights – check operation.
☑ Check tire pressure @ posted value – check periodically while towing.

Maintenance (monthly)

☑ Check battery fluid once each month. Add distilled water if level is below indicating ring.
☑ Lubricate pivot points and swivel jack shafts (lube hole on outer tube near handle) every three months. Use good grade of chain lube.
☑ Check tire pressure @ posted value when regular maintenance is performed.
☑ Clean sign panels and solar panels periodically as required.
**Assigning Quick Picks Messages**

- Touch **“Log In”** button.
- Enter valid password and touch **“OK”** button (if required).
- Touch **“Quick Picks”** button.
- Select one of the six (6) pre-programmed **Quick Picks Messages** by touching the message once to preview (message window will turn yellow) and twice to activate (message window will turn green indicating selected message is displayed on sign panel).
- To add a message to **Current Quick Picks** from **Message Library**, touch desired message in **Message Library** then touch **right arrow button** to move desired message to **Current Quick Picks**. If desired message is not in **Message Library**, follow **Message Creation and Editing** procedure to add desired message to **Message Libraries**.

**Note:** up to six (6) messages may be added to Current Quick Picks.

- To remove a message from **Current Quick Picks** touch desired message in **Current Quick Picks** and then touch **left arrow button**.
- When finished touch the **“Finished”** button twice and then touch the **“Log Out”** button.

---

**Quick Picks**

**Displaying Quick Picks Messages:**

- Touch **“Log In”** button.
- Enter valid password and touch **“OK”** button (if required).
- Touch **“Quick Picks”** button.
- To blank the sign panel touch the **“Blank”** button and follow instructions provided.
- When finished touch the **“Finished”** button to logout and verify that correct message is displayed on sign panel.
Message Creation Using the Library

1) Touch “Log In” button.
2) Enter valid password and touch “OK” button (if required).
3) Touch “Manage Messages” menu selection.
   • To display a message currently saved in the Message Library touch the desired message (message will be displayed in blue on right Preview Screen) and touch yellow check-mark ✓ (message will be displayed in amber on left Active Message Screen and on sign panel).
   • To create and save a message in the Message Library touch the green plus (+) button to activate the Message Creation and Editing pane and follow Message Creation and Editing procedure on card #5.
   • To create, save and immediately display a message on the sign panel touch the yellow check and green plus ✓+ button to activate the Message Creation and Editing pane and follow the Message Creation and Editing procedure on card #5.

• Touch “Schedule Messages” menu selection.
• To view existing Time & Date Scheduled Messages touch the “Schedules” button.
• To add a new Scheduled Message touch the “Add” button and follow instructions provided.
• To edit an existing Scheduled Message touch the message and then touch the “Edit” button and follow instructions provided.
• To delete an existing Scheduled Message touch the message and then touch the “Delete” button.
• When finished touch the “Finished” button twice and then the “Log Out” button.

Event Based Message Scheduling

• Touch “Log In” button.
• Enter valid password and touch “OK” button (if required).
• Touch “Schedule Messages” menu selection.
• To view existing data-driven Event Scheduled Messages touch the “Events” button.
• To add a new Scheduled Event touch the “Add” button and follow instructions provided.
• To edit an existing Scheduled Event touch the message and then touch the “Edit” button and follow instructions provided.
• To delete an existing Scheduled Event touch the message and then touch the “Delete” button.
• When finished touch the “Finished” button twice and then the “Log Out” button.
Check battery voltage, photocell level, time & date, IP address, etc.

Touch “Log In” button.
• Enter valid password and touch “OK” button (if required).
• Touch “Information” button.
• When finished touch “Log Out” button.

Setting Date and Time

• Touch “Log In” button.
• Enter valid password and touch “OK” button (if required).
• Touch “Settings” menu selection.
• Touch “Date and Time” button.
• Adjust Date, Time and Time-Zone as desired and touch “OK” button.

Controller Resets

• Touch “Log In” button.
• Enter valid password and touch “OK” button (if required).
• Touch “Tools” menu selection.
• Touch “Controller Resets” and perform one of the following:

• To clear all messages from Message Library and all Schedules and Events from Scheduler - touch “Reset Message Library”.

• To clear all Schedules and Events from Scheduler - touch “Reset Schedules and Events”.

• To reset all factory set-points and clear all passwords - touch “Reset Factory Settings”.

• To perform a complete master reset (all of the above) - touch “Unit Reset”.

7
**LED Display Module Replacement**

1) Open sign panel door and locate the ¼-turn wing-head captive fasteners on the LED Display Module to be replaced.

2) Rotate each ¼-turn fastener counter-clockwise ¼-turn and carefully remove module from sign panel.

3) Remove power and data connector from module by squeezing the two locking tabs and pulling the connector free.

4) Insert connector into new replacement module until two (2) clicks are heard (both locking tabs are engaged).

5) Insert replacement module back into sign panel.

6) Push and rotate all ¼ turn captive fasteners clockwise until secure. Close and latch sign panel door.

7) Restart control console if necessary.

**Control Console Replacement (P/N MB-22-915)**

1) Turn off main power switch located on the energy management system.

2) Raise control console into operating position.

3) Disconnect all connectors from back of control console.

4) Rotate the controller slide locks located just underneath the small flat supports with two rubber bumpers at the top of each track (normally covered by the control console lifting handles when controller is in stored position) outwards to open slide tracks.

5) Lift controller up and out of the slide tracks.

*Reinstall control console by reversing procedure.*
