

Save Time, Money and Aggravation:

Install SolarTrak GPS trackers, and here's what you'll get:

No more misplaced equipment

No job delays - know that the equipment is in place and ready to use

More efficient use of your Repair Crew - send them right to the affected machine

Easy and accurate billing: no customer disputes!

A healthy fleets will earn more income

...all for **less than \$10 per month** per tracker!

How SolarTrak Works:

The tracker is installed on your equipment and connected to the engine's battery. GPS satellite communication determines location and cellular service reports the information to our secure servers. Then access the data online by pc, tablet or smart phone app.

Easy to Customize: With SolarTrak, you can sort by asset type, branch, geofences and other filters. Create reports on Movement, Engine Hours, Maintenance and many other features.

Designed for construction and rental equipment:

Skid Steers

Back Hoes

Boom Lifts

Generators

Excavators

Air Compressors

Pickup Trucks

Message Boards

Arrow Boards

Mini-excavators

Wood Chippers

Rollers

Delivery Vans

Service Vehicles

Construction Trucks

...and more!

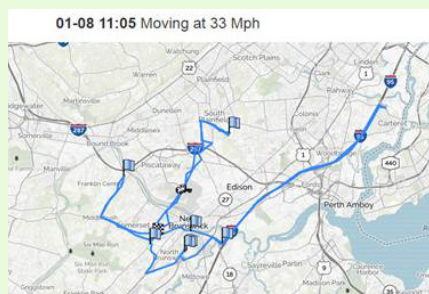

**GPS Fleet Tracking and Management -
for under \$10 per month!**

- Track your equipment
- Locate equipment by GPS
- Know when its operating
- Make billing easier
- Option to track mileage

Designed for construction vehicles and equipment!

Vehicle Mileage Tracking Option:

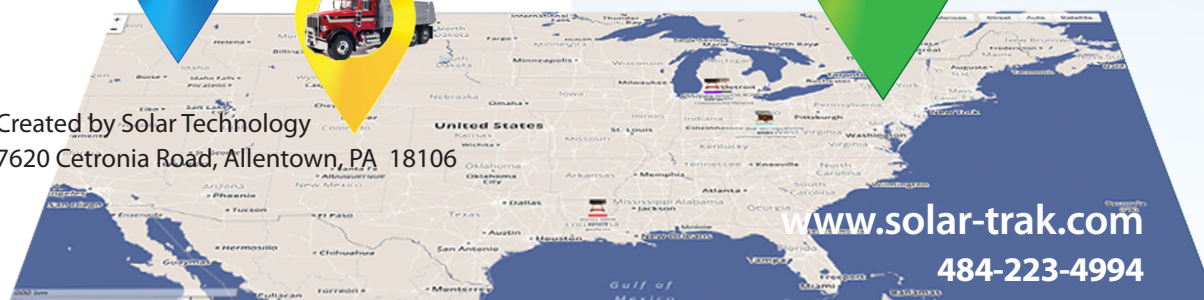

Track mileage, get speed alerts, use "replay a day" to see travel route, determine maintenance by mileage and track miles by state for IFTA fuel tax compliance... for all your vehicles!

Essential Data that Tracks, Monitors and Manages your Fleet:

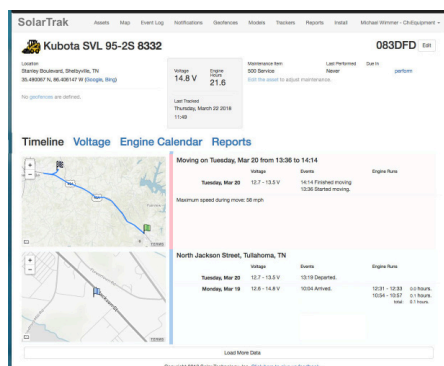

Know Where Equipment is, and What it's Doing

Install SolarTrak GPS trackers on your construction or rental equipment, and here's what you'll know:

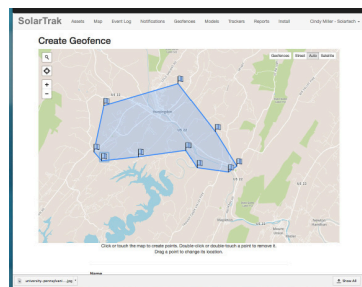

- GPS location of your equipment
- Alerts by email or text when it moves
- Engine-hours report & calendar
- Reminders when maintenance is due
- Battery voltage monitoring

Never "misplace" equipment again. With SolarTrak fleet management, you know where it is, what it's doing, and you will be alerted when it moves.

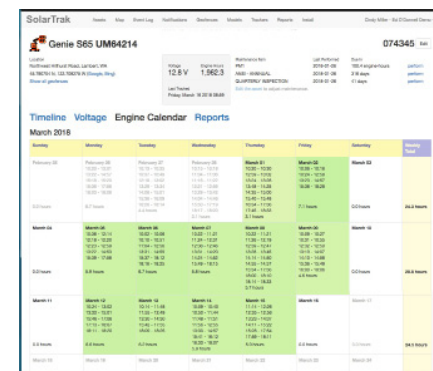

EQUIPMENT DATA SUMMARY

Use the Timeline tab to see equipment movement (pink bar), current location (blue bar). Choose Voltage to see battery status, and Engine Calendar to see exact equipment operation.

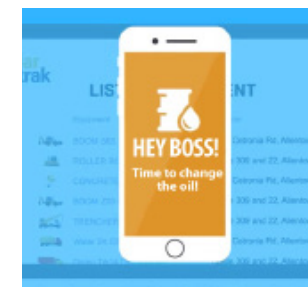

GEOFENCES

Create a virtual fence around your yard or a project, then get email or text alerts when equipment moves in or out.

ENGINE HOURS REPORTS

Simplify billing. You'll know if and when equipment was operating with the Engine Hours calendar. No more disputes with customers!

MAINTENANCE REMINDERS

Extend the life of your fleet by keeping it healthy. SolarTrak sends alerts when routine maintenance is due.

Small and easy to install, the tracker connects to your equipment's battery. Choose internal or external antenna.

AFFORDABLE Pricing: \$9.95 per tracker per month!

RENT: Trackers with external antenna are \$10.95 per month. Add \$2.50 per month for Vehicle Mileage Tracking Option.

BUY: Tracker with internal antenna \$595.00
Tracker with external antenna \$655.00
See website for pricing or call your sales rep.
