

WebSuite

PRODUCT GUIDE

Web-Based Software Solutions

WebSuite is a web-based application that provides users with a **one-stop user-friendly** solution to build, manage, and control their traffic safety equipment from **any device with a web browser**. It empowers users to effortlessly update messaging, monitor equipment health, and analyze traffic patterns.

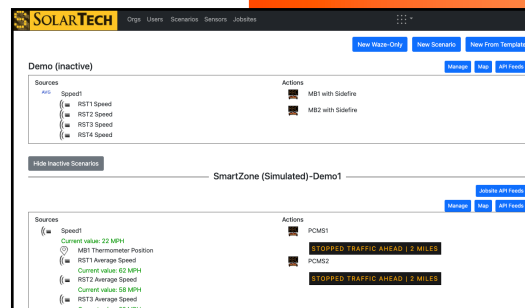

WebSuite not only simplifies but revolutionizes the landscape of the traffic safety industry, ensuring a safer and more efficient operational experience.

SmartZone

SolarTech's real-time traffic management software solution designed to improve traffic flow, as well as worker and driver safety. SmartZone enables users to create, monitor, and manage ITS scenarios remotely without third party programming, and it is compatible with any NTCIP-enabled message board, regardless of manufacturer.

SmartZone analyzes and displays real-time data collected from sensors and connected traffic safety equipment.

- ▶ Smart Arrow Boards
- ▶ Work Zone Cameras
- ▶ Traffic Data Collection
- ▶ State and National Data Feeds provided via HAAS Alert
- ▶ Virtual Data Feeds for Connected Work Zone Automation provided via Here.com

SmartZone meets requirements in DOT bids and provides traffic management solutions.

- ▶ Queue Warning Systems
- ▶ Travel Time Information Systems
- ▶ Variable Speed Limit Systems
- ▶ Dynamic Lane Merge Systems
- ▶ Trucks Entering Highway Systems
- ▶ Incident Detection Systems
- ▶ Over Height Detection and Warning Systems

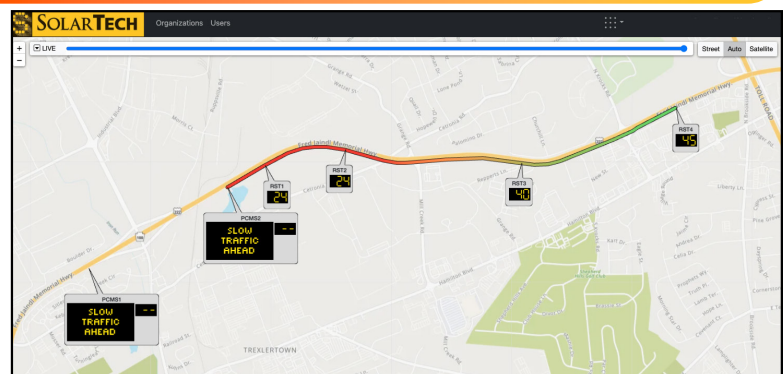

Workzone Live

View all your smart work zones in a heat map summary. This screen gives you all the information you need to see traffic and activity in your smart work zone quickly and easily.

Quickly access all your smart work zones to:

- ▶ Identify Speeds
- ▶ View Still Images from Cameras
- ▶ View Messaging on Connected Trailers

Additionally, you have the option to provide access to third parties, such as State DOT officials, allowing them insight into the smart work zones.

Everything you need to manage your work zone... right at your fingertips!

WebSuite

Software Solutions

Reports

Generate reports for your traffic safety equipment and work zones.

Reports include:

- ▶ Units
- ▶ Battery History
- ▶ Low Battery
- ▶ Unit Issues
- ▶ Message History
- ▶ Work Zone History
- ▶ DOT Work Zone History
- ▶ DOT Work Zone Summary History
- ▶ Sensor History

SolarTrak

GPS / Telemetry Fleet Management Solution for rental and construction equipment that improves safety, productivity, and profitability at an affordable monthly cost.

SolarTrak will optimize the productivity of your assets, improve logistics, manage your equipment, and protect against theft – all while making your fleet management easier!

With solutions for powered and non-powered assets, our affordable solutions offers up-to-the-minute information on:

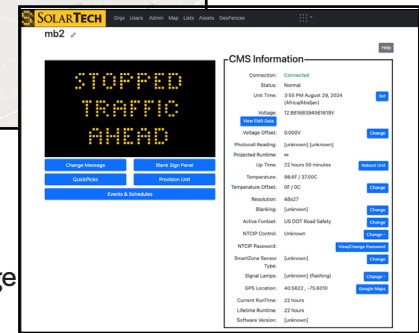

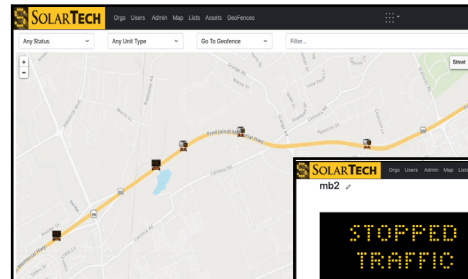

- ▶ GPS Asset Tracking
- ▶ Asset Check-ins
- ▶ Maintenance Tracking
- ▶ Geofencing

Command Center

Command Center is SolarTech's fleet management software that allows you to track, manage, and monitor all your traffic safety equipment right from your PC, tablet, or smartphone. Create and schedule messages on PCMS's, view status information about your signs including battery voltage,

estimated runtime, GPS location, and much more.

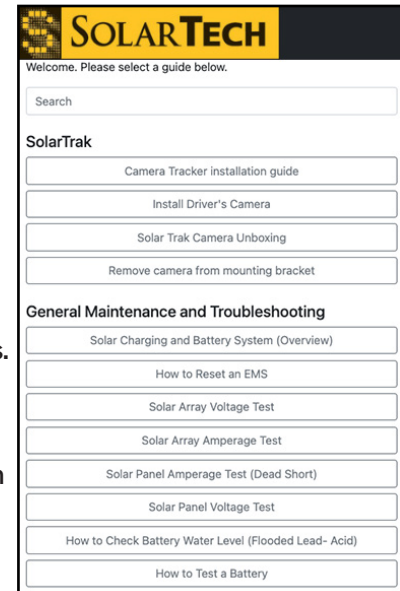

Receive notifications via email or text when a message has been changed, battery voltage is below 12 volts, a sign panel error or failure occurs, and more. Users can determine which notifications they would like to receive. Additionally, permissions can be assigned to other users, and all changes made can be tracked by user.

Support Guides

Access over 100 support guides and videos 24/7. This library of information provides step-by-step instructions to most questions regarding maintenance, troubleshooting, and installation for our products.

Cameras

View all camera feeds from your equipment in one location. View still images, video, and pan/tilt/zoom with applicable cameras.

WebSuite keeps you connected anytime, anyplace!
